

Diagram 1 | To create a building campaign that sensitively connects to and respects the existing building while presenting a new vision of museum beyond the standard wall and pedestal.

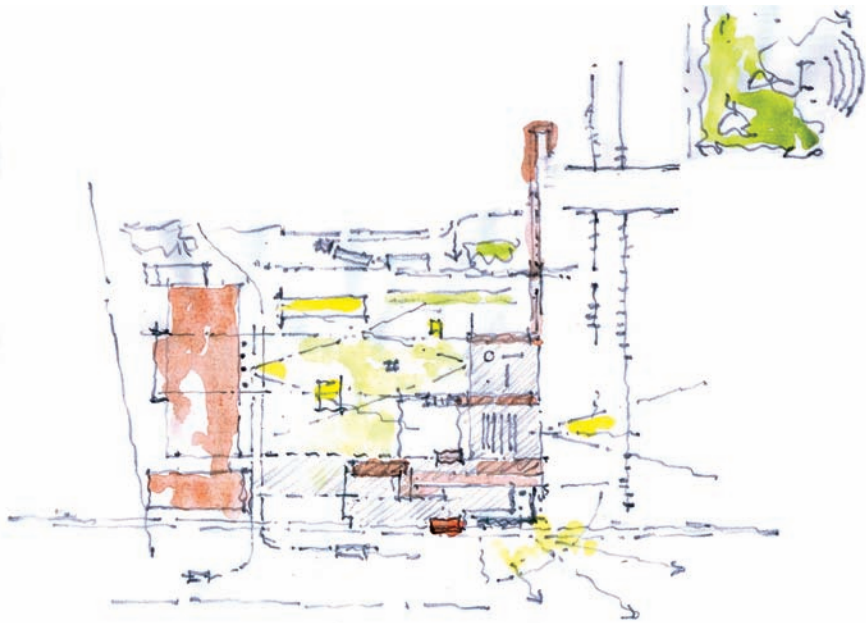

Diagram 2 | To create a lively and dynamic spatial experience on North Main Street while making a pedestrian connection to St. Clair Park.

Diagram 3 | To create a building that utilizes the natural slope of North Maple and North Main Streets to organize the new building program, enhance interior/ outdoor relationships and conceal the need for on-site parking and building services.

Diagram 4 | To integrate new parking in a sensitive way beneath a newly established landscape podium.

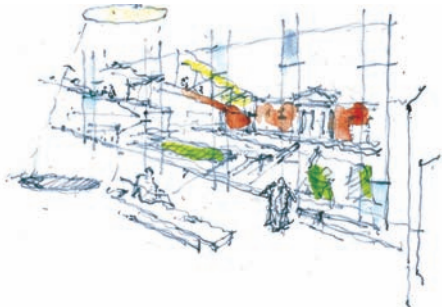

Image 1/ 2 | To create an internal landscape that is defined by both new and existing buildings and does not marginalize the existing building façade.

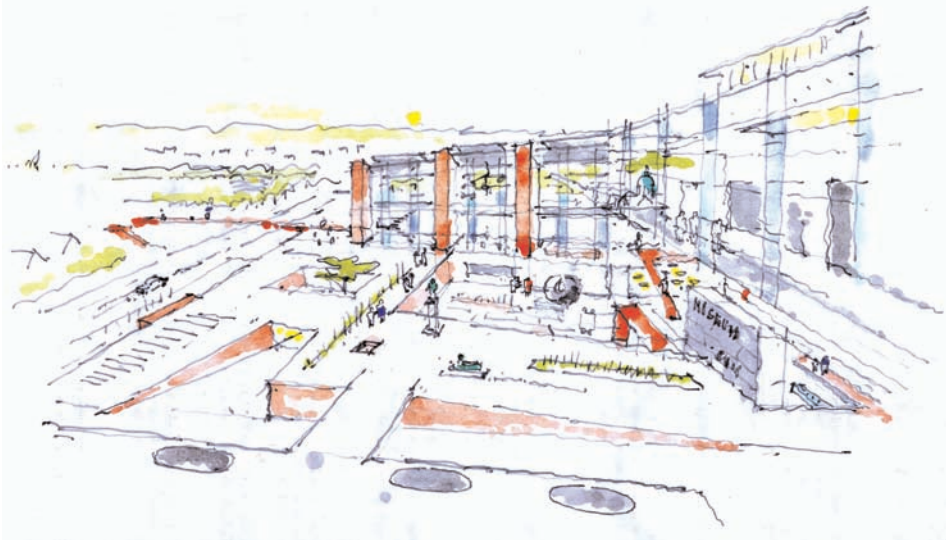

Image 3 | To create a new vision of entry that relates to Main Street, the new landscape space(s) and new entry piazza.

Image 4 | To frame views of the natural landscape and city through the pedestrian's architectural experience within the building and landscape.
